

10Q Analytics Assessment

Why an Analytics Assessment?

Organizations collect data, often by multiple teams in multiple locations. Understanding how this data can be leveraged to help with organizational priorities should begin with linking disparate data and iterating through data deep dives and dashboarding to identify performance and the factors impacting KPIs. Our 10Q - Analytics Assessment can help you identify your opportunities and get the most from your data.

Steps to an Analytics Assessment

Focus Groups and Interviews

Data Gathering and Monitoring

Iterative Data Analysis

Interactive Dashboards

What to Expect?

At the end of an Analytics Assessment, you can expect to receive a presentation of the most impactful results and a report with all of the information gathered throughout the process. You will also receive any dashboards that we have build throughout the process. In addition to these artifacts, NLP Logix will provide an analytics action plan to help operationalize the findings and get your data working for you!
